

AI, Safeguarding, and Classroom Management – Unified

One platform to become proactive, not reactive.

StudentKeeper® is the unified EdTech solution that brings safeguarding, wellbeing, and classroom management into a single, intuitive platform.

Powered by ContentKeeper's enterprise architecture, it replaces fragmented systems with proactive visibility, real-time control, and seamless integration – enabling schools to protect, engage, and empower every learner.

The Unified Platform Advantage

- Integrated Architecture:** Filtering, safeguarding, wellbeing, classroom tools, and parental engagement – all built into one cohesive interface.
- Maximum Device Visibility:** Full cross-platform coverage for iOS, ChromeOS, and Windows without vendor-specific apps or extensions.
- Seamless Experience:** Unified tools eliminate the need to juggle multiple logins or dashboards, simplifying IT management and improving staff efficiency.

Actionable Classroom Management

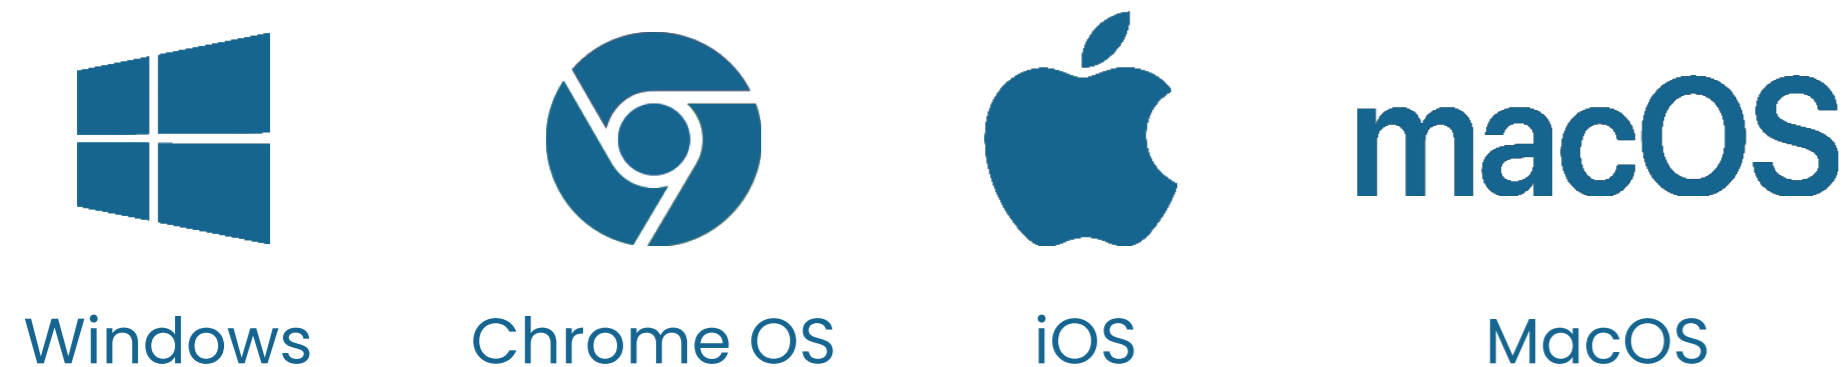

- Live Screen & Browser Monitoring:** Teachers view live thumbnails of every student's screen and active tabs in real time.
- Focus & Engagement Insights:** Aria uses passive signals (tab switching, inactivity) to generate focus alerts and attention scores.
- Immediate Session Controls:** Close tabs, lock screens, or message students instantly, all from the same dashboard.
- Flexible Instruction Support:** Supports multi-class, co-teaching, and policy enforcement with custom allow/block lists.

Proactive Safeguarding & Student Wellbeing

- Real-Time Risk Identification:** AI-powered keyword and context analysis detects potential self-harm, violence, or bullying behaviours instantly.
- Role-Based Alert Routing:** Automatic alerts go directly to the correct DSL, counsellor, or principal for swift intervention.
- Customisable Keyword Management:** Schools tailor keyword lists, policies, and alerts to reflect local safeguarding priorities and emerging trends.
- Forensic Reporting for DSLs:** View captures grouped by student, keyword, and severity to reveal patterns and support early intervention.
- Forensic Reporting for DSLs:** View captures grouped by student, keyword, and severity to reveal patterns and support early intervention.

Compatible with:

Windows Chrome OS iOS MacOS
